

Viewpoints of Granada

Just as you can get to know **Granada** by losing yourself in its narrow alleys, tapas in its bars or visiting its monuments, there is another way to capture its essence: through the vision offered by its viewpoints.

The well-known **Viewpoints** of **San Nicolás**, with the Alhambra in the background, a very repeated postcard, is joined by others such as Los **Carvajales** and Santa Isabel la Real that offer privileged views of the Christian domes and towers. From the Viewpoints de **San Cristóbal**, we can admire the snow-capped peaks of Sierra Nevada, the fertile fertile plain and the Arab walls fused into a single image.

Route designed for lovers of culture, art and sport, mixing all the flavors that Granada and its monuments offer us. In Electric Bikes we will easily climb the slopes to the excellent viewpoints that the different geographical points of the city offer us, with views of the Nasrid Fortress. We will pass through the famous neighborhoods of **Sacromonte** and **Albaicín**.

We will mix with its unique inhabitants, impregnating ourselves with flamenco with its music and dance, in addition to its gastronomy. We will visit the famous gypsy caves where they perform their shows. To finish, we will walk through the souks and bazaars of the Arab area, where we can make purchases of typical products or simply stop at the famous tearooms and enjoy the different varieties of Moorish tea and pastries.

Safety and respect

We will exercise extreme caution on vehicle traffic lanes. Being respectful of pedestrians and making the least environmental impact are part of our values. Mandatory to wear a helmet.
